Dear Sirs,  
I would be sorely disappointed to hear that the FCC would make a ruling against XM radio and the like by supporting the NAB's petition 04-160. Satellite radios services go far beyond what FM and AM could only hope to provide. It is able to help me plan my day by providing consistent and effective breakdowns of weather and traffic as well as provide an extra level of protection through the weather reports. These services are part of the reason why I have paid for my subscription for the past 18 months and will continue to do so well into the future.

Please do not support 04-160.

Sincerely,

Dan Hurley  
Palos Park, IL
